Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting is required.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document is proposed and coordinated by the Ministry of Agriculture and Rural Affairs of the People's Republic of China.

This document was drafted by: China Agricultural University, Inner Mongolia Autonomous Region Sino-Mongolian Medical Research Institute, Inner Mongolia University of Science and Technology Baotou Medical College, Jingfukang Pharmaceutical Group Co., Ltd.

The main drafters of this document are: Hao Zhihui, Dong Xuehui, Li Minhui, Sun Qun, Wang Wenle, Gao Xueyan, Zhang Chunhong, Shan Feibiao, Liu Chang, Bi Yaqiong, Su Guolin, Ma Jun. *Atractylodes macrocephala*

1 Scope

This document establishes the production procedures of the authentic medicinal material *Atractylodes lancea*, and stipulates the selection of production areas, seed and seedling preparation, planting techniques, field management, etc.

It provides operating instructions for the stages of processing, harvesting and primary processing at the origin, packaging and storage, and describes traceability methods such as production record and file management.

This document applies to the production of *Atractylodes lancea* in Heilongjiang, Jilin,

Liaoning, Inner Mongolia, Hebei and other adjacent ecologically similar areas.

3.1 Daodi herbs

The selected products are selected through long-term clinical application of traditional Chinese medicine, produced in a specific region, and have higher quality and efficacy than the same kind of traditional Chinese medicine produced in other regions.

Better, stable quality and highly recognizable Chinese medicinal materials.

3.2 Bei Cangzhu

Atractylodes chinensis (DC.) Koidz., a plant of the genus *Atractylodes* in the Asteraceae family, has its dried rhizomes used as medicine.

4 Production technology flow chart

The production technology process of *Atractylodes lancea* is shown in Figure 1.
