Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed and coordinated by the National Cybersecurity Standardization Technical Committee (SAC/TC260).

This document was drafted by: National Information Center, Jiangxi Big Data Center, Sangfor Technologies Co., Ltd., Guizhou Information Center, Institute of Information Engineering, Chinese Academy of Sciences, Guangdong Provincial Government Services and Data Management Bureau, Zhejiang Provincial Data Bureau, Zhejiang Provincial Big Data Development Center, Anhui Big Data Center, Wuxi Data Bureau, Beijing Big Data Center, Zhejiang Development Information Security Evaluation Technology Co., Ltd., China Telecom Electronic Technology Standardization Institute, Qi'anxin Wangshen Information Technology (Beijing) Co., Ltd.

The main drafters of this document are: Xu Chunxue, Ren Fei, Luo Haining, Cheng Zidong, Luan Guochun, Song Botao, Tian Zhipan, Wang Pengbiao, Yu Xiaolei, Ma Zaiying, He Liming, Luo Huayang, Yu Jing, Luo Qiwei, Zhu Dian, Wang Hu, Zhao Chengyao, Zhao Zhangjie, Jiang Zihai, Wang Jun, Xu Xia, Li Ting, Xu Yujia, Bai Yuqiang.

Data security technology Government data processing security requirements

1 Scope

This document proposes a security framework for government data processing, specifies security system requirements, security technology protection requirements and security operation management requirements. Management requirements.

This document is applicable to regulating the government data processing activities of government departments and technical support institutions, as well as competent (supervisory) departments, third-party institutions, supervision and evaluation by the relevant agencies.

4 Security Framework for Government Data Processing

Based on the network security level protection of government data infrastructure, a government data processing security framework is proposed for government data processors.

The framework consists of three parts. security system specifications for government data processing, security technology protection, and security operation management, as shown in Figure 1.
