Introduction

Because of their limited vision, the visually impaired can only obtain information through touch, hearing or a small amount of vision.

The United Nations for the Blind estimates that less than 10% of all publications are accessible to visually impaired people.

access to accessible formats is a real barrier to their education, finding employment opportunities, and pursuing an independent life.

This information gap has become more and more obvious in the Internet age. All parties are constantly working to narrow it through multiple channels.

The state protects the rights of persons with disabilities to obtain literature and information through legal policies.

Article 43 of the Law on the Protection of Persons with Disabilities stipulates. "Organize and support the compilation and publication of Braille books, audio books for the blind and other
