What this standard covers

This standard specifies: Buick smoothness instrument side with fixed smoothness of paper and cardboard Test methods. This standard applies to the small paper and cardboard smoothness determination. Its measurement range is very wide, especially for the relatively smooth paper and cardboard. But for very smooth samples. The measurement time is very long. Will bring inaccurate results. This standard does not apply to measuring the thickness of greater than 0, . Mm or air permeability of the great Paper and paperboard, Because a lot air through the test surface will affect the test results. This standard does not apply to rough paper and cardboard smoothness determination.

Document data

International classification (ICS): 85.060.

Chinese classification (CCS): Y32.

Estimated length of the Chinese original: 7,765 words.

Adopted international standard: ISO 5627-1995; IDT.

Supersedes the earlier edition GB/T 456-1989.
