Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document is proposed and coordinated by the China Federation of Supply and Marketing Cooperatives.

This document was drafted by: Sichuan Yingu Carbon Sink Renewable Resources Co., Ltd., China Renewable Resources Recycling Association, GEM Co., Ltd.

Company, Anhui Shuangying Renewable Resources Group Co., Ltd., Shenzhen Qixin Environmental Protection Technology Co., Ltd., Shandong Haiwo Jiamei Environmental Engineering Co., Ltd.

Jiangsu Jetta Oil Products Co., Ltd., Beijing Urban Construction North Group Co., Ltd., Zhongbiao Hexin (Beijing) Certification Co., Ltd., Shenzhen Lukun Technology Technology Co., Ltd., Zhongshan Torch Environmental Protection New Materials Co., Ltd., Nanjing Kaiyan Electronics Co., Ltd., Weifulai (Zhejiang) Technology Co., Ltd. company.

The main drafters of this document are: Cao Yang, Tang Yanju, Niu Feng, Xiong Jianyin, Xu Kaihua, Xing Hongwei, Xu Tiecheng, Pan Yonggang, Zhu Xiaoli, Liang Min, Du Wenqiang, Tao Zhen, Wang Zhenxing, Sun Xiaofeng, Zhou Changsai, Fang Yong, Huang Baowen, Wang Sheng, Zhang Liqiang.

Recycling sites of renewable resource recycling system Construction Specifications

1 Scope

This document defines the terminology of renewable resource recycling sites in the renewable resource recycling system and establishes the The general principles for the construction of bioresource recovery sites are set out, and the general requirements, construction requirements for transaction points and transfer stations are specified.

This document applies to the construction of recycling sites in the renewable resource recycling and utilization system.

2 Normative references

3 Terms and definitions

The terms and definitions defined in GB/T 37515 and the following apply to this document.

3.1 Collection site

The terminal entity of the renewable resource recovery system is a place used for the recovery, classification, reduction, storage and transfer of renewable resources.

Note 1. Recycling sites are generally located in communities, public institutions, industrial and mining enterprises, villages or other places where recycled resources are concentrated.

Note 2. Recycling sites include transaction points and transfer stations.

3.2 Colection station

A place used for the placement, recycling, classification and temporary storage of renewable resources.

Note. Trading points include fixed trading points and mobile trading points.

3.3 transfer station

A place for centralized recycling, primary sorting, volume reduction, storage and transportation of renewable resources.

3.4

A trading point with a fixed position.

Note. Fixed trading points include store-type trading points and box-type trading points.
