Introduction

According to the Guiding Opinions on Deepening the Reform of Urban Law Enforcement System and Improving Urban Management Work issued by the CPC Central Committee and the State Council, Urban furniture has become an important part of China's urban construction management. In recent years, China's economy has shifted from a high-speed growth stage to a high-quality Urban furniture is an important part of urban infrastructure, an important starting point for current urban renewal work, and a "high-quality" urban furniture.

The key nodes of "quality" construction and "fine" management are to improve the level of urban planning, construction, and governance, and to create livable, resilient, and smart cities.

An important support for the city.

Urban furniture is a developing field in China. The standards for the types of facilities it covers are fragmented and scattered in various fields.

The systematic basic standards, technical standards and method standards in the

professional field of urban furniture are aimed at solving the practical problems encountered by various places in urban renewal construction.

It solves international issues and provides technical support for the systematic, standardized and high-quality development of urban furniture.

This document aims to provide a systematic concept of urban furniture system planning and design, and a systematic method of planning and design to achieve urban The goal of furniture system construction.

Urban public facilities Urban furniture System Planning and Design Guide

1 Scope

This document establishes the general principles for the planning and design of urban furniture systems and provides guidance for the planning and design of urban furniture systems.

This document applies to urban furniture system planning and design activities.
