This document was proposed and coordinated by the National Technical Committee for Standardization of Urban Public Facilities Services (SAC/TC537).

This document was drafted by: Shanghai Qihe Urban Furniture Development Co., Ltd., Donghua University, Beijing Institute of Standardization, China Construction Eighth Engineering Bureau Construction Co., Ltd., Beijing Municipal Bureau of Landscape and Greening, Beijing Garden and Ancient Architecture Design and Research Institute Co., Ltd., Beijing Standardization Association, Shanghai Municipal Engineering Engineering Design and Research Institute (Group) Co., Ltd., China Association for Standardization, Qibao Town Urban Construction Management Affairs Center, Minhang District, Shanghai, Zhejiang Huishi Environmental Art Co., Ltd. and NARI Nanjing Control Systems Co., Ltd.

The main drafters of this document are: Bao Shidu, Liu Bo, Tian Chuan, Lan Yujing, Shen Libing, Bao Liran, Zhang Zhenghong, Yu Yongbo, Zhao Qian, Yang Fengju, Zhang Yao, Fu Li, Zhang Xinyu, Li Zhihua, Yu Siyang, Dong Yin, Zheng Qiaoying, Fan Yiqun, Shen Danni, Mao Dan, Tian Shunli, Song Shude, Luo Man, Yang Min, Cha Peng, Zheng Yucheng, Wang Yimeng, Lin Chengyun, Lin Wenbiao, Liu Yanwen, Liu Jun, Wang Jin, Fang Jiongyi, Hu Bosong, Zhao Yang, Tu Huixi, Zhang Jianzhou, Cao Xiaobing.

Introduction

According to the Guiding Opinions on Deepening the Reform of Urban Law Enforcement System and Improving Urban Management Work issued by the CPC Central Committee and the State Council, Urban furniture has become an important part of China's urban construction management. In recent years, China's economy has shifted from a high-speed growth stage to a high-quality Urban furniture is an important part of urban infrastructure and an important tool for urban renewal.

The key nodes of "high-quality" construction and "fine management" are to improve the level of urban planning, construction, and governance, and to create a livable, resilient, and smart city.

An important support for the city.

Urban furniture is a developing field in China, and the standards for the types of facilities it

covers are fragmented and scattered in various field standards.

The systematic basic standards, technical standards and method standards in the professional field of urban furniture are aimed at solving the practical problems encountered by various places in urban renewal construction.

It solves international issues and provides technical support for the systematic, standardized and high-quality development of urban furniture.

This document summarizes and analyzes the existing problems and measures in the maintenance and management of urban furniture at this stage, and provides guidance for high-standard, systematic and refined Urban furniture maintenance and management work.

Urban public facilities Urban furniture System Maintenance and Management Guide

1 Scope

This document establishes the general principles for the maintenance and management of urban furniture systems and provides recommendations for system maintenance and system management.

This document applies to urban furniture system maintenance and management activities.

2 Normative references

GB/T 42873
