Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting is required.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed by the China General Chamber of Commerce.

This document is under the jurisdiction of the National Technical Committee on Standardization of Condiments (SAC/TC 398).

This document was drafted by: Beijing Technology and Business University, Xiamen Inno Information Technology Co., Ltd., Hebei University of Science and Technology, Beijing Agricultural and Forestry Science University Institute, Linyi Xincheng Jinluo Meat Products Group Co., Ltd.

The main drafters of this document are: Ma Aijin, Zhong Chunyan, Li Jinhua, Wang Zhixin, Ni Laixue, Yao Xianqi and Du Dongxu.

Technical Specifications for Condiment Traceability

1 Scope

This document specifies the design, implementation and information recording of the traceability system of relevant organizations in the condiment supply chain, and describes the corresponding verification methods.

This document applies to the establishment and management of traceability systems for relevant organizations in the condiment supply chain.

2 Normative references

GB/T 20903

GB/T 38155

3 Terms and definitions

The terms and definitions defined in GB/T 20903 and GB/T 38155 and the following apply to this document.

3.1 Traceability system

Support the maintenance of products and their ingredients throughout the supply chain or part of the production and use of the desired acquisition of product history, application or A set of continuous elements that are interrelated or interact with each other, such as location information.

[Source. GB/T 38155-2019, 2.9]

3.2 Traceability scope

Tracing the breadth achieved.

Note. Includes internal traceability and external traceability.

3.3 traceability unit

Individual products or batches of products that need to be recorded, identified and traced for their history, application or location products or products of the same category.

[Source. GB/T 38155-2019, 2.4]

3.4 traceability information

Information that enables effective links between organizations and between processes within an organization within the scope of product traceability (3.2).

Note. Includes basic traceability information and extended traceability information.

3.5 receiving information

Information about a product at a previous link in the traceability chain recorded by an organization within the product traceability scope (3.2)

3.6 output information

Information about a product at the next link in the traceability chain recorded by an organization within the product traceability scope (3.2).
