Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed by the China Machinery Industry Federation.

This document is under the jurisdiction of the National Technical Committee for Standardization of Fans (SAC/TC187).

This document was drafted by: Shenyang Blower Group Co., Ltd., Shenyang Turbine Machinery Co., Ltd., and Sinopec Group Material Equipment Co., Ltd.

Turbo compressors for petroleum refining plants

1 Scope

This document specifies the technical requirements, test methods, inspection rules, packaging, transportation and storage of turbo compressors used in petroleum refining plants.

This document is applicable to single-shaft centrifugal compressors and axial flow compressors in reforming, hydrogenation, catalytic cracking and delayed coking units in petroleum refining. Manufacturing.

This document does not apply to integrally geared centrifugal compressors.
