3.2 Dismantling Center

3.3 and optimize resource allocation

4 Composition of waste agricultural machinery recycling system

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed by the China Machinery Industry Federation.

This document is under the jurisdiction of the National Agricultural Machinery Standardization Technical Committee (SAC/TC201).

This document was drafted by: Tianjin Renewable Resources Research Institute of China National Supply and Marketing Cooperatives, Agricultural Mechanization Station of the Ministry of Agriculture and Rural Affairs, Green Co., Ltd., China Renewable Resources Recycling Association, China Renewable Resources Development Group Co., Ltd., Shandong Sanhe Machinery Technology Co., Ltd.

Co., Ltd., Ningxia New Dazhong Machinery Co., Ltd., China Recycling (Tianjin) Recycling Resources Co., Ltd., and the State Administration for Market Regulation Technology Research Center, Beijing Commercial Machinery Research Institute of the All-China Federation of Supply and Marketing Cooperatives, and Anhui Zhongying Huinong Technology Industrial Development Co., Ltd.

The main drafters of this document are: Qin Jie, Zhao Ye, Xing Hongwei, Li Dandan, Zhang Linna, Xu Kaihua, Cao Yang, Tian Jinming, Wang Jihua, Zhou Yi, Kuai Lijun, Wu Liping, Du Tao, Tang Yanju, Wu Xiaoyan, Zhao Bin, Huang Keqiang, Guo Xin, Wang Suran, Zang Jia, Ji Huan.

Specifications for the construction of a recycling system for used agricultural machinery

1 Scope

This document stipulates the composition of the waste agricultural machinery recycling system and the construction requirements of recycling outlets, dismantling centers and information management platforms.

The corresponding verification method is described.

This document applies to the construction of a waste agricultural machinery recycling system.

2 Normative references

GB 2894

GB 12348

GB 18597

GB 18599

3 Terms and definitions

The following terms and definitions apply to this document.

3.1 Take-back network

A place where activities such as receiving, purchasing, registering, sorting and storing used agricultural machinery are carried out.

3.2 Dismantling Center

Processing of waste agricultural machinery, dismantling of assemblies and reusable parts, disassembly or crushing of machine bodies and structural parts, etc.

Places for activities such as crushing, cleaning, sorting, storage and transportation.

3.3 and optimize resource allocation

Using modern information technology, it has the functions of data collection, processing,

storage and analysis to achieve data sharing and improve management efficiency.

4 Composition of waste agricultural machinery recycling system

4.1 The waste agricultural machinery recycling system consists of three parts. recycling outlets, dismantling centers and information management platforms.
