8.6 Web Page	9
8.7 Database	10
9 Watermark service packaging format selection	11
9.1 SDK Package	11
9.2 SaaS Packaging	11
9.3 Product Packaging	11
Appendix A (Informative) Common Digital Watermarking Algorithms	12
A.1 Watermark Embedding/Extraction Algorithm	12
A.2 Watermark encoding/decoding algorithm	12
A.3 Compatibility of Common Watermarking Algorithms with Main Types of Watermark Carriers	13
Appendix B (Informative) Typical Security Scenarios	14
B.1 Data Copyright Protection14 B.2 Data Leakage Tracking and Origin.....	14
B.3 Watermarking of Generative AI-Generated Content	15

B.4 Network data classification, grading, identification and management	16
B.5 Data Integrity Protection	17
Appendix C (Informative) Method for evaluating the effectiveness of watermark technology functions	18
C.1 Basic Functions	18
C.2 Enhancement	18
C.3 Specific functions	18
Appendix D (Informative) Digital Watermark Security Model Reference	19
D.1 Overview	19
D.2 Security Threats	19
D.3 Safety Goal	19
D.4 Confidentiality Protection19 D.5 Integrity Assurance	19
D.6 Availability Guarantee	20
D.7 Testing and Evaluation	20

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document is proposed and coordinated by the National Cybersecurity Standardization Technical Committee (SAC/TC260).

This document was drafted by: Alibaba (Beijing) Software Services Co., Ltd., Alibaba Cloud Computing Co., Ltd., China Electronics Technology Standardization Research Institute, Beijing Kuaishou Technology Co., Ltd., China Academy of Information and Communications Technology, Tsinghua University, AsiaInfo Technologies (Chengdu) Co., Ltd., Ant Technology Group Co., Ltd., Sangfor Technologies Co., Ltd., Beijing Topsec Network Security Technology Co., Ltd., Huidun Information Security Technology (Suzhou) Co., Ltd., Beijing Volcano Engine Technology Co., Ltd., China Information Security Evaluation Center, National Information Technology Security Research Center Center, National Computer Network Emergency Response Technical Processing Coordination Center, Beijing Shuanxing Technology Co., Ltd., China Mobile Communications Group Co., Ltd., Hefei Gaowei Data Technology Co., Ltd., the Third Research Institute of the Ministry of Public Security, Venusstar Information Technology Group Co., Ltd., and Beijing Yuanjian Information Technology Co., Ltd.

Technology Co., Ltd., Hangzhou Anheng Information Technology Co., Ltd., Qi'anxin Technology Group Co., Ltd., Hangzhou Meichuang Technology Co., Ltd.

Co., Ltd., Hangzhou Hikvision Digital Technology Co., Ltd., and Shenzhen Liansoft Technology Co., Ltd.

The main drafters of this document are: Zhu Hongru, Sun Yong, Sun Weiwei, Yang Rui, Zhou Chenwei, Xu Yujia, Zhu Xuefeng, Luo Hongwei, Chen Tian, Cao Jing, Jing Huiyun, Jin Tao, Xu Ke, Liao Shuangxiao, Lin Guanchen, Song Botao, Bao Yingming, Meng Bin, Lian Yihan, Fan Hangyu, Sun Mingliang, Yang Tao, Zhang Xiaona, Liu Yuhong, Jiang Weiqiang, Jingjing, Guo Yugang, Ding Zhiguo, Zhou Ruiqun, Zheng Rong, Tian Lidan, Ma Yong, Zhou Jie, Li Chaozhao, Gong Xiaoqian, and Wang Yan.

Network Security Technology Digital Watermarking Technology Implementation Guide

1 Scope

This document provides the implementation framework, functions, processes, watermark algorithm selection, watermark service packaging selection and other aspects of digital watermark technology. suggestions.

This document applies to the design, development, application and testing of digital watermarking technology.

2 Normative references

GB/T 25069

3 Terms and Definitions

The terms and definitions defined in GB/T 25069 and the following apply to this document.

3.1

Identify or protect the copyright, source, or content security of digital media by embedding subtle specific information in digital content. technology.

Note. Digital watermark is short for digital watermark. The "digital watermark" in this document refers to implicit watermark (also called "dark watermark", "invisible watermark", "implicit watermark", "invisible watermark").

The embedded information is hidden and unidentifiable to the data user.

3.2 watermark information

Specific information embedded in digital media through digital watermarking technology (3.1).

Note. Common watermark information includes but is not limited to copyright information, traceability information, link information, organization/employee identifier (ID), time information, etc.

3.3 watermark carrier watermarkcarrier

Digital content such as documents, images, audio, video, web pages, databases, etc. that are used to embed or carry watermark information (3.2).

Note. In this document, it is referred to as vector.

3.4 Watermark encoding

The watermark information (3.2) is converted into a form or format suitable for embedding into a watermark carrier (3.3).

3.5 Watermark decoding watermarkdecoding

The watermark information (3.2) extracted from the watermark carrier (3.3) is restored to its original form or format.

3.6 Watermark embedding

The process of embedding watermark information (3.2) into the watermark carrier (3.3).
