Deodorizer for solid recovered fuels

固体回收燃料用除臭剂

Issued on: June 30, 2025

Implemented on: January 1, 2026

**Issued by: State Administration for Market Regulation;
Standardization Administration of the PRC**

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document is proposed by China Building Materials Federation.

This document is under the jurisdiction of the National Technical Committee on Cement Standardization (SAC/TC184).

This document was drafted by: China Building Materials Research Institute Co., Ltd., Huaxin Cement Co., Ltd., Zhejiang Zheneng Xingyuan Energy Co., Ltd.

Energy Technology Co., Ltd., Shenzhen Green Ring Recycling Resources Development Co., Ltd., and Sichuan Xichen Recycling Environmental Protection Technology Co., Ltd.

The main drafters of this document are: Zeng Zheng, Zheng Xu, Liu Chen, Li Chunping, Zhang Jie, Zhang Dongming, Yang Chen, Wu Yang, Liu Mingan, Wen Peiyan, Zhang Jinshan, Pan Meichen.

Deodorant for solid recovered fuel

1 Scope

This document specifies the classification and code, technical requirements, Test methods, inspection rules, as well as packaging, transportation and storage.

This document applies to the delivery and acceptance of deodorizers for solid recovered fuels.

2 Normative references

GB/T 14678

GB/T 21604

GB/T 21605

GB/T 21826

3 Terms and Definitions

The following terms and definitions apply to this document.

3.1 solid recovered fuel

The non-hazardous solid waste generated in the production and life process is used as the source, and the waste is sorted through pretreatment, impurity removal, crushing, screening, sorting, molding and other single A fuel prepared by one or a combination of processes, which, when burned in a cement kiln system or in an additional combustion device, can provide thermal energy for cement clinker production.

3.2 deodorizer

Substances used to suppress or eliminate odors generated during the preparation, storage, transportation and use of solid recovered fuels used in cement kilns.

4 Classification and Code

According to their properties and working principles, deodorants are mainly divided into. chemical deodorants (codenamed DSRF-H), biological deodorants (codenamed DSRF-S) and plant-based deodorant (codenamed DSRF-Z).

5.1 General

5.1.1 The safety of deodorants used for space atomization or spraying shall comply with the requirements of Table 1.
