Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part 1: Structure and Drafting Rules of Standardization Documents". Drafting.

Please note that some content in this document may involve patents. The issuing

organization of this document assumes no responsibility for identifying patents.

This document was proposed by the China Machinery Industry Federation.

This document is under the jurisdiction of the National Technical Committee on Standardization of Agricultural Machinery (SAC/TC201).

This document was drafted by: China Academy of Agricultural Mechanization Sciences Group Co., Ltd., and Weichai Lovol Smart Agriculture Technology Co., Ltd.

Beidou monitoring system for agricultural machinery operations

1 Scope

This document specifies the system composition, terminal requirements, platform requirements, inspection rules and markings, and packaging of the Beidou monitoring system for agricultural machinery operations.

The loading, transportation, and storage of the equipment are described, along with the corresponding testing methods.

This document applies to the design, manufacture, and inspection of Beidou monitoring systems used in agricultural machinery for field operations such as plowing, planting, managing, and harvesting.
