Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part

1.Structure and Drafting Rules of Standardization Documents". Drafting. Please note that some content in this document may involve patents. The issuing organization of this document assumes no responsibility for identifying patents. This document was proposed by the Ministry of Public Security of the People's Republic of China. This document is under the jurisdiction of the National Technical Committee on Standardization of Security and Alarm Systems (SAC/TC100). This document was drafted by: the First Research Institute of the Ministry of Public Security, Suzhou Keda Technology Co., Ltd., and Beijing Zhongdun Security Technology Group Co., Ltd. Company, State Information Center, Zhejiang Liyuan

Technology Co., Ltd., Beijing Megvii Technology Co., Ltd., Oriental Network Technology Co., Ltd., Public Security Bureau The Third Research Institute of the Ministry, Jinpeng Electronic Information Machinery Co., Ltd., Hangzhou Hikvision Digital Technology Co., Ltd., and Zhejiang Dahua Technology Co., Ltd. Limited Liability Company, Zhejiang Uniview Technologies Co., Ltd., Huawei Technologies Co., Ltd., Hangzhou DPtech Co., Ltd., and Vimicro Technology Co., Ltd. Limited Company. The main drafters of this document are. Shi Juling, Yang Xuejun, Zhao Wendao, Yin Ping, Sun Lili, Yang Wei, Du Yunpeng, Li Hongmei, Li Pengfei, and Li Wei. Qi Li, Wei Yi, Liao Shuanglong, Kong Weisheng, Wu Canyi, Zhang Yi, Qiu Junjie. Public safety video image information network sharing application General Requirements

1 Scope

GB/T 46361-2025 is the Chinese national standard covering the overall rules for sharing surveillance between agencies - what may be shared and with whom, the catalogue and the request process, the authorisation and the record of every access, and the responsibilities of the party that receives the material. First edition, under the Ministry of Public Security. In force from 1 May 2026. Issued on 5 October 2025, it has been in force since 1 May 2026.

This document specifies the basic requirements, architecture, and technical requirements for the networked sharing of public safety video image information. This document applies to the overall planning, scheme design, and engineering implementation of networked sharing applications for public safety video image information.

2 Normative references

The contents of the following documents, through normative references within the text, constitute essential provisions of this document. Dated citations are not included. For references to documents, only the version corresponding to that date applies to this document; for undated references, the latest version (including all amendments) applies. This document.

GB/T 28181 Technical requirements for information transmission, exchange and control of public security video surveillance network systems

GB 35114 Technical Requirements for Information Security of Networked Video Surveillance in Public Security

GB/T 46344 (all parts) Public Security Video Image Analysis System

GB/T 46358 Technical Requirements for Operation and Maintenance Management Platform of Public Security Video Image Information Network Application

GB/T 46362 Technical Requirements for Integrated Application Systems of Public Security

Video Image Information

GB/T 46363 Technical Requirements for Integrated Application Service Interface of Public Security Video Image Information

3 Terms and Definitions

The terms and definitions defined in GB/T 28181 and the following terms and definitions apply to this document.

3.1 A platform for publishing video surveillance resource catalogs and exchanging video streams in public areas across various departments and industries.

3.2 A platform built by a department or industry to enable video image networking and provide comprehensive video surveillance management services.

3.3 A platform that centralizes and provides unified access to video streams related to public safety that are not part of departmental or industry construction.

3.4 forpublicsecurity Automatically or interactively acquired through online video image information acquisition devices/systems or public security video image analysis systems. A system that records video image information and provides services such as storage, query, analysis, arming, and network sharing.
