Data security technology Personal information protection compliance audit requirements

1 Scope

GB/T 46903-2025 is the Chinese national standard covering auditing an organisation's handling of personal information - the lawful basis and consent, the minimisation and retention, the sharing and cross-border transfer, the rights of the individual and the security measures, with the evidence an auditor collects for each. China's personal information law requires these audits, and this is what the auditor works from. First edition, 25,000 words. It was issued on 31 December 2025 and has been in force since 1 July 2026, as a first edition. The document is under the responsibility of the Standardization Administration of China. This page is published from the official record of the 2025 edition; the clause text of a standard this recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.

This document outlines the principles for personal information protection compliance auditing, and specifies the overall requirements, implementation procedures, and procedures for such audits. Content and methods. This document applies to personal information processors and professional organizations conducting personal information protection compliance audits.
