Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part

1. Structure and Drafting Rules of Standardization Documents". Drafting. Please note that some content in this document may involve patents. The issuing organization of this document assumes no responsibility for identifying patents. This document was proposed and is under the jurisdiction of the National Technical Committee on Standardization of Plant Quarantine (SAC/TC271). This document was drafted by: China Academy of Quality Inspection and Testing Sciences, National Agricultural Technology Extension Service Center, and the National Forestry and Grassland Administration. Biological Disaster Prevention and Control Center, Research Center for International Inspection and Quarantine Standards and Technical Regulations of the General Administration of Customs, Northwest A&F University, China Environmental Science Research Institute, Shanghai Municipal Agricultural Technology Extension Service Center, Beijing Municipal Gardening and Greening Resources Protection Center, Beijing Municipal Plant Protection Station, Beijing Chang Pinggu District Park and Green Space Management Center, Beijing Botanical Garden Management Office. The main drafters of this document are. Xu Han, Chen Ranran, Li Juan, Sun Shuangyan, Wang Xiaoliang, Jiang Pei, Hu Xiaoping, Zhang Hao, Zhao Caiyun, Luo Jinyan, and Mi Ying. Wang Yin, Lu Qintan, Li Feifei, Pan Xubin, Zhang Junhua, Tian Qian, Zhang Yongjiang. Guidelines for the Management of Limited Non-Quarantine Pests

1 Scope

GB/T 46950-2025 is the Chinese national standard covering pests already present in a country but regulated on planting material - the category that covers most seed and nursery stock certification, where the point is not exclusion but keeping the pest out of the propagating material. First edition, with the phytosanitary measures guideline GB/T 46949-2025. It was issued on 31 December 2025 and has been in force since 1 July 2026, as a first edition. The document is under the responsibility of the Standardization Administration of China. This page is published from the official record of the 2025 edition;

the clause text of a standard this recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.

This document establishes the concept, characteristics, and application principles of defined non-quarantine pests. This document is applicable to guiding management decisions and practices related to designated non-quarantine pests, and is applicable to the Plant Protection Agency Enactment Act. Regulations, risk analysis, and quarantine measures.

2 Normative references

The contents of the following documents, through normative references within the text, constitute essential provisions of this document. Dated citations are not included. For references to documents, only the version corresponding to that date applies to this document; for undated references, the latest version (including all amendments) applies. This document. 3 Terms and Definitions

The terms and definitions defined in IPPC/ISPM5, as well as the following terms and definitions, apply to this document.

3.1 Regulated non-quarantine pests (RNQP) A non-quarantine pest that exists in cultivated plants, affecting their intended use and causing economic hardship. The consequences of this situation necessitate the implementation of controls within the territories of the importing contracting parties.

Note 1: RNQP is only applicable to plants used for cultivation.

Note 2."Limited" means officially controlled.

3.2 Quarantine pests (QP) It has potential economic importance to the threatened region, and has not yet occurred in the region, or has occurred but is not widespread and is being monitored by the authorities. Controlled pests.

3.3 Plants for planting Plants that have been planted, are to be planted, or need to be replanted.

Note. This includes seeds, bulbs, tubers, and various asexual propagation materials, which can be whole plants or parts of plants, such as cuttings. It also includes "already planted".
