1 Scope

GB/T 46975-2025 is the Chinese national standard covering the portable carry cot - the handles and their attachment, which is the failure that drops a baby, the mattress and the suffocation hazard, the stability, the ventilation and the marking that says what the cot may and may not be used for. First edition, 21,500 words, in force from 1 June 2026. It was issued on 31 December 2025 and has been in force since 1 June 2026, as a first edition. The document is under the responsibility of the China National Light Industry Council. This page is published from the official record of the 2025 edition; the clause text of a standard this recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.
