1 Scope

GB/T 47050-2026 is the Chinese national standard covering the sawn and planed bamboo strip - the semi-finished material from which laminated bamboo boards, flooring and furniture are glued up, with its dimensions and tolerances, its moisture content and its defects. First edition, one of the bamboo standards issued together this year. It was issued on 28 January 2026 and has been in force since 1 August 2026, as a first edition. The document is under the responsibility of the National Forestry and Grassland Administration. This page is published from the official record of the 2026 edition; the clause text of a standard this recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.

This document defines the terminology and definitions for bamboo strips, specifies their classification, technical requirements, inspection rules, marking, packaging, transportation, and storage, and describes... The testing method was proposed. This document applies to the production, sale, and inspection of bamboo strips.

2 Normative references

The contents of the following documents, through normative references within the text, constitute essential provisions of this document. Dated citations are not included. For references to documents, only the version corresponding to that date applies to this document; for undated references, the latest version (including all amendments) applies. This document.

3 Terms and Definitions

The terms and definitions defined in GB/T 36394-2018, as well as the following terms and definitions, apply to this document.

3.1 After bamboo tubes are split into strips, they are mechanically processed into long strips with specific dimensions and a generally rectangular cross-section. [Source: GB/T 36394-2018, Definition 2.1.9, with modifications]

3.2 lateral flexure Bending along the length of the side of the bamboo strip.

3.3 wavy cut and chatter mark During the planing process, uneven planing or feeding can cause wavy tool marks on the surface of bamboo strips.

3.4 The bamboo yellow residue remaining on the surface of the bamboo strips after processing.

3.5 The bamboo green residue remaining on the surface of the bamboo strips after processing.

3.6 color variation The difference in color on the same surface of the bamboo strip.
