Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part

1. Structure and Drafting Rules of Standardization Documents". Drafting. Please note that some content in this document may involve patents. The issuing organization of this document assumes no responsibility for identifying patents. This document was proposed by the State Press and Publication Administration. This document is under the jurisdiction of the National Technical Committee on Standardization of Publication Distribution (SAC/TC505). This document was drafted by: Beijing Zhongqi Zhiyuan Digital Information Technology Co., Ltd., Jiuzhou Publishing Co., Ltd., and Sichuan Wenxuan Online. E-commerce companies, Jiangsu Phoenix Xinhua Bookstore Group Co., Ltd., Fujian Xinhua Bookstore Group Co., Ltd., and North China University of Technology. The main drafters of this document are. Li Gang, Ning Yi, Zheng Beixing, Tang Bin, Ni Xiangjun, Zhong Kai, Tang Wenjie, Cao Renjie, Li Yuhong, Liu Yang, and Guo Jun. He Li.

The Specification standard, GB/T 30330-2013 "Format Specification for Book Product Information in Online Information Exchange of Chinese Publications", was released for the first time. The revised version of GB/T 30330-2023, released in 2023, replaced GB/T 30330-2013. Over ten years of practical application have demonstrated It is clear that there is an urgent need to develop a standard format for confirming the receipt of book product information. This was stated in a document released by the Electronic Data Interchange Organization for the International Book Industry in 2015. The matSpecification's supporting standard is a response standard used after receiving book product information, which standardizes the data for confirming book product information. Format. This document aims to establish a feedback mechanism for receiving book product information, to be used in conjunction with GB/T 30330-2023, and to form a data... Closed-loop management of the two-way information chain; timely detection and resolution of data errors in information exchange, improving the quality of information exchange and achieving information sharing. The goal is to achieve information symmetry, data integrity, and usability. Based on international standards, the main technical changes in the Format Specification are as

follows:

---Added terms and definitions;

---The wording of the content clauses conforms to the requirements of my country's standards, norms, and language;

---The label uses "Referencename" from ONIX 3.0, instead of "Short" used in versions prior to ONIX 3.0. The tag is consistent with GB/T 30330-2023;

---The XML schema is defined using XSD, instead of the DTD which is not recommended in ONIX 3.0. China Publications Online Information Exchange Book Products Information confirmation format

1 Scope

GB/T 47133-2026 is the Chinese national standard covering the acknowledgement message of China's ONIX-equivalent book data exchange - what a receiving system sends back to say which records it accepted, which it rejected and why, which is the unglamorous half of any data exchange and the half that decides whether it works. At 44,000 words it is a complete message specification. First edition, in force since 1 March 2026. It was issued on 28 January 2026 and has been in force since 1 March 2026, as a first edition. This page is published from the official record of the 2026 edition; the clause text of a standard this recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.

This document establishes the book product information confirmation process, and specifies the book product information confirmation message, the book product information confirmation message header, and... Book product records. This document applies to responses regarding the receipt of book product information sent using GB/T 30330-2023.
