Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part 1: Structure and Drafting Rules of Standardization Documents".

This document adopts ISO 29467:2008 "Determination of verticality of thermal insulation products for building purposes". This document adds a chapter on "Normative References".

The following minimal editorial changes have been made to this document.

---Incorporating the amendments to ISO 29467:2008/Amd1.2014, the relevant clauses are indicated by vertical double margins. The line (|) is marked.

1 Scope

This document specifies the equipment and procedures for measuring the perpendicularity deviation of the entire product in the length, width, and thickness directions.

This document applies to thermal insulation products with right-angled edges. Other irregularly shaped products may refer to this document for further information.

2 Normative references

This document has no normative references.

3 Terms and Definitions

The following terms and definitions apply to this document.

3.1 Deviation from squareness

The distance from the side of the right-angle ruler to the edge of the product at a specific distance from the angle (see Figures 1-3).
