Foreword

GB/T 48064-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 28 August 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 March 2027.

This edition replaces GB/T 7920.12-2013.

The document adopts an international standard (ISO or IEC).

It is under the responsibility of the China Machinery Industry Federation.

Classification: ICS 91.220; CCS P97.

1 Scope

Paver-finishers lay asphalt and similar materials in road construction, and buyers and sellers need a shared vocabulary to compare machines. This document covers the terminology and commercial specifications for paver-finishers within road construction and maintenance machinery, so that manufacturers describe their machines in a consistent format.

Equipment manufacturers, dealers, importers, contractors who buy or rent machines, and tender writers can use it. Technical translators and sales teams also benefit from standard terms when preparing brochures and data sheets.

It is a recommended national standard (GB/T) and adopts an international standard. It takes effect on 1 March 2027 and replaces GB/T 7920.12-2013, so documentation prepared against that earlier part should be checked against the new edition. The specific terms and the list of commercial data items are set out in the full text.
