Foreword

GB/T 48080-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 28 August 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 March 2028.

It is under the responsibility of the China General Chamber of Commerce.

Classification: ICS 67.220.10; CCS X66.

1 Scope

This standard covers general quality requirements for chicken powder seasoning, a granular flavouring widely used in Chinese cooking, in food processing and in catering. Chicken powder is made to deliver a savoury chicken taste and is sold both to households and to commercial kitchens and food manufacturers.

The standard is intended for seasoning manufacturers, food ingredient suppliers, quality control and laboratory staff, catering and food processing buyers, and distributors or importers of Chinese condiments. It gives the industry a common reference when product specifications and quality expectations are set.

The document was issued on 28 August 2026 and takes effect on 1 March 2028, so producers have a lengthy period to prepare. It is a recommended national standard (GB/T), meaning it is voluntary unless adopted in a contract, supply agreement or another binding document. The full text should be consulted for the detailed provisions.
