What this standard covers

This standard specifies requirements for cargo transport packages and unit tests for low-pressure test equipment used when the main performance requirements, test procedures and test reports. This section applies to evaluate pressurized position when transported by air and flying height does not exceed 3 500 m positions in non- pressurized aircraft transport packages and unit cargo resistant to impact the ability of low pressure on the contents and packaging of protection. For higher altitude ground transport packages and unit cargo can be carried out with reference to the part of the low-pressure tests.

Document data

International classification (ICS): 55.020.

Chinese classification (CCS): A83.

Estimated length of the Chinese original: 7,730 words.

Adopted international standard: ISO 2873-2000, MOD.

Supersedes the earlier edition GB/T 4857.13-1992.
