

ICS 31.22
CCS L 10

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 5095.12-1997

**Electromechanical components for electronic equipment. Basic testing
procedures and measuring methods. Part 12: Soldering tests. Section 6: Test 12f.
Sealing against flux and cleaning solvents in machine soldering**

(English Translation)

Issued on: December 26, 1997

Implemented on: October 1, 1998

Issued by: State Bureau of Technical Supervision

What this standard covers

This standard specifies the test methods detailed in the electronic equipment specification requirements of electromechanical components, should be given using. Similarly detailed specifications elements can also be used. Is to establish a detailed standard test method to assess element seal welding machine welding process in flux and detergent-resistant effect. The test results of the test results can not be representative of other fluxes, such as resin mentioned in this standard - to reduce foaming flux and solder and other cleaning methods.

Document data

International classification (ICS): 31.22.

Chinese classification (CCS): L10.

Estimated length of the Chinese original: 6,667 words.

Adopted international standard: IEC 60512-12-6-1996, IDT.
