Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part

1. Structure and Drafting Rules of Standardization Documents". Drafting. This document replaces GB/T 5147-2003 "Classification, Naming and Codes of Fishing Gear". Compared with GB/T 5147-2003, the main differences are structural adjustments and... Aside from editorial changes, the main technical changes are as follows:

a) The principles for classifying fishing gear have been changed (see Chapter 4, Chapter 2 of the 2003 edition);

b) The naming and codes for fishing gear categories have been changed (see Chapter 5, Chapter 3 of the 2003 edition);

c) The order of writing the classification names and codes of fishing gear has been changed, and a summary table of the types, models, and codes of fishing gear has been created (see Chapter 6). Chapter 4 of the 2003 edition. Please note that some content in this document may involve patents. The issuing organization of this document assumes no responsibility for identifying patents. This document was proposed by the Ministry of Agriculture and Rural Affairs of the People's Republic of China. This document is under the jurisdiction of the National Technical Committee on Fisheries Standardization (SAC/TC156). This document was drafted by: Shanghai Ocean University, East China Sea Fisheries Research Institute of Chinese Academy of Fishery Sciences, and Deep-Sea Technology Service (Jiangsu) Co., Ltd. The company, Shandong Huanqiu Fishing Tackle Co., Ltd., Shandong Haoyuntong Fishing Net Technology Co., Ltd., Zhejiang Ocean University, and Nantong Zhongyu Fishing Tackle Limited Company. The main drafters of this document are: Zhang Jian, Zhang Xun, Sun Manchang, Qian Weiguo, Zhou Hao, Zhang Xiaoxian, Zhao Shaode, Cao Wenying, Feng Huanhuan, and Qi Guangrui. The release history of this document and the document it replaces is as follows:

---First published in 1985 as GB/T 5147-1985, and revised for the first time in 2003;

---This is the second revision. Fishing gear classification, naming and code

1 Scope

GB/T 5147-2026 is the Chinese national standard covering the classification of fishing gear - trawls, seines, gillnets, traps, lines and dredges, with the nomenclature and codes by which a gear type is identified in a licence, a logbook or a fishery statistic. Fisheries management is written in these categories, so the classification is a regulatory instrument. It replaces GB/T 5147-2003 and has been in force since 1 September 2026. It was issued on 27 February 2026 and has been in force since 1 September 2026, replacing GB/T 5147-2003. The document is under the responsibility of the Ministry of Agriculture and Rural Affairs. This page is published from the official record of the 2026 edition; the clause text of a standard this recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.

This document establishes the methods and principles for classifying fishing gear, defines the naming and codes for fishing gear, and establishes the book of fishing gear classification names and codes. Write it in order. This document applies to fields such as fisheries production, management, scientific research, and teaching.

4 Principles of Fishing Gear Classification

4.1 General Principles Fishing gear is classified into three levels according to fishing principles, structural characteristics, and operating methods. the first level is "category", the second level is "type", and the third level is... It is a "style". 4.2 "Class" The fishing principle of fishing gear is used as the basis for classifying "classes". Fishing gear with the same fishing principle belongs to the same category. 4.3 "Type" The classification of fishing gear into "types" is based on the structural characteristics of the smallest unit that enables it to achieve its fishing principle. Fishing gear with different structural characteristics should be classified accordingly. They are divided into different "types". 4.4 "Form" The classification of fishing gear into "types" is based on the method of operation. Fishing gear with different operating methods should be classified into different "types".

5 Naming and Codes for Fishing Gear Classification

5.1 Class Name and Code The names and codes of the "classes" are shown in Table 1.

5.2 Name, Code, and Structural Description of Type The code for each "type" is composed of the lowercase letters of the Chinese pinyin of the name of each "type". The name, code and structure of each "type" are explained in Table 2.

5.3 Description of the name, code, and operation method of the formula The code for each "formula" corresponds to a different "formula" name, and is represented by two Arabic numerals. The name, code, and operating method of the "formula" are explained below. See Table 3.

6. The order in which the classification names and codes of fishing gear are written. Fishing gear classifications are written in the order of "Type", "Class", and "Stage", that is, the name of the fishing gear is "Type" "Class"; without limitation When referring to the "type" or "style" of fishing gear, the "type" or "style" corresponding to the name of the fishing gear can be omitted. Fishing gear classification codes are written in the following manner. The symbols for "formula" are shown in Table

3. They can be omitted when there is no limitation. The code for "type" is shown in Table

2. It can be omitted when there is no specific requirement. The codes for "classes" are shown in Table 1. The types, models, and corresponding codes of various fishing gear shall be in accordance with the provisions of Appendix A. Examples of naming and code names for different categories of fishing gear are provided in the appendix. Record B. GB/T 5147-2026. Classification, Naming and Codes of Fishing Gear ICS
