What this standard covers

This standard specifies the determination of linear alkyl benzene sulfonate industrial average relative molecular mass approach. This standard applies to the determination of linear alkyl benzene. This standard does not apply for the determination of branched-chain alkyl benzene (due to peak branched alkyl benzene can not be identified).

Document data

International classification (ICS): 71.100.40.

Chinese classification (CCS): G72.

Estimated length of the Chinese original: 12,174 words.

Adopted international standard: ISO 6841-1988, MOD.

Supersedes the earlier edition GB/T 5178-1985.
