What this standard covers

This standard specifies the determination of two similar colored pigments visually compare the relative tinting strength and common law test methods dilute the color. When this method is not applicable to a particular generic product should require a special method for the determination of relative tinting strength and dilute color pigments.

Document data

International classification (ICS): 87.060.10.

Chinese classification (CCS): G53.

Estimated length of the Chinese original: 4,438 words.

Adopted international standard: ISO 787-16-1986, EQV.

Supersedes the earlier edition GB 1708-1979.
