### What this standard covers

This standard specifies the side given quite material samples in boiling water solubles content Common test methods. GB/T 5211. 1 cold extraction method provides the determination of the cold water soluble content approach. For dry pigments and most concerned, these two test methods will give different results, so the technical requirements should be clearly indicate the method used in the test report that the methodology used.

### Document data

International classification (ICS): 87.060.10.

Chinese classification (CCS): G53.

Estimated length of the Chinese original: 3,390 words.

Adopted international standard: ISO 787-3-2000, IDT.

Supersedes the earlier edition GB/T 5211.2-1985.
