

ICS 83.120
CCS Q 23

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 5352-2005

Replacing GB/T 5352-1985

**Fiber-reinforced thermosetting plastic composites pipe --
Determination for external loading properties by parallel-plate
loading**

(English Translation)

Issued on: May 18, 2005

Implemented on: December 1, 2005

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People Republic of China, China National
Standardization Administration Committee**

What this standard covers

This standard specifies: Determination by two parallel loading plates reinforced thermosetting plastic pipe external load performance test sample, test conditions, test procedures, test results and test report. This standard applies to: Determination of fiber-reinforced thermosetting plastic pipe pipe stiffness, stiffness factor and the load deformation curve. Other composite pipe can also refer to the use.

Document data

International classification (ICS): 83.120.

Chinese classification (CCS): Q23.

Estimated length of the Chinese original: 7,762 words.

Adopted international standard: ASTM D2412-1996a; NEQ.

Supersedes the earlier edition GB/T 5352-1985.
