What this standard covers

This standard specifies the preparation of fiber wound pressure vessels and internal pressure test and strength calculation. This standard is applicable to the preparation of a sample of a fiber wound pressure vessel having a defined geometry and an internal pressure test under specified conditions to determine the apparent tensile parameters of the fiber wound pressure vessel.

Document data

International classification (ICS): 83.120.

Chinese classification (CCS): Q23.

Estimated length of the Chinese original: 10,124 words.

Adopted international standard: ASTM D2585-1990; MOD.

Supersedes the earlier edition GB/T 6058-1985.
