

ICS 25.020

CCS J 42

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 6060.2-2006

Replacing GB/T 6060.2-1985

**Roughness comparison specimens -- Ground, turned, bored,
milled, shaped and planed**

表面粗糙度比较样块磨、车、膛、铣、插及刨加工表面

(English Translation)

Issued on: February 5, 2006

Implemented on: August 1, 2006

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People's Republic of China, Standardization
Administration of the People's Republic of China**

What this standard covers

This standard specifies the mill, vehicles, boring, milling, shaped and planed surface roughness comparison specimens (referred to as "specimens") terms and definitions, manufacturing method, classification, , surface roughness parameters and assessment, surface characteristic structure and sizes, processing textures and signs and other packaging. This section applies to grind, vehicles, boring, milling, shaped and planed surface roughness comparison specimens. The specimens used for the characterization of the same material and the same processing method for machining the surface, to determine the value of the parameter of surface roughness of machined parts. This section can also be used as optional grinding, vehicles, boring, milling, shaped and planed surface roughness values ??obtained by the method of reference.

Document data

International classification (ICS): 25.020.

Chinese classification (CCS): J42.

Estimated length of the Chinese original: 7,779 words.

Adopted international standard: ISO 2632-1-1985, MOD.

Supersedes the earlier edition GB/T 6060.2-1985.
