What this standard covers

This standard specifies the measurement conditions, measurement performance, measurement method, so that there may be different testers test results were compared. This standard does not specify performance requirements (can receive RDS feature requires limits). This measuring method is to determine the overall performance of the receiver instead of each functional unit separately.

Document data

International classification (ICS): 33.160.20.

Chinese classification (CCS): M74.

Estimated length of the Chinese original: 11,114 words.

Adopted international standard: IEC 60315-9-1996, IDT.
