What this standard covers

This standard specifies the determination of the melting point of the organic reagent capillary method using common methods. This standard applies to the determination or powdered crystalline melting point of the organic reagent.

Document data

International classification (ICS): 71.040.30.

Chinese classification (CCS): G60.

Estimated length of the Chinese original: 6,652 words.

Adopted international standard: ISO 6353-1-1982, NEQ.

Supersedes the earlier edition GB/T 617-1988.
