What this standard covers

This standard specifies the adhesive force under tensile strength of the glue joint determination pick. This standard applies to all kinds of adhesives. This standard applies to the test at room temperature, but also to test the temperature and other environmental conditions. This standard requires a rigid test bars, test bars after processing, to achieve the required dimensional tolerances and can withstand a tensile force of the test.

Document data

International classification (ICS): 83.18.

Chinese classification (CCS): G38.

Estimated length of the Chinese original: 6,693 words.

Adopted international standard: ISO 6922-1987, MOD.

Supersedes the earlier edition GB 6329-1986.
