What this standard covers

This standard provides fast and accurate evaluation of steel or copper- zinc alloy castings on a nickel chromium and nickel chromium electrodeposition layer outdoor corrosion resistance approach. Outdoor use of the product in the period and the results of this standard have not been described and explained. For 1. 1 systems other than the sedimentary layers or materials using this test method, this method should first verify that the appropriate relationship with its outdoor use.

Document data

International classification (ICS): 25.220.40.

Chinese classification (CCS): A29.

Estimated length of the Chinese original: 9,939 words.

Adopted international standard: ISO 4539-1980, IDT.

Supersedes the earlier edition GB/T 6466-1986.
