

ICS 77.040.30
CCS H 21

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 6524-2003

Replacing GB/T 6524-1986

**Metallic powders -- Determination of particle size distribution
by gravitational sedimentation in a liquid and attenuation
measurement**

(English Translation)

Issued on: November 3, 2003

Implemented on: May 1, 2004

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People Republic of China**

What this standard covers

This standard specifies: metal powder in suspension when settling due to gravity by measuring the beam passes through suspension the amount of attenuation to calculate the particle size distribution methods. This standard applies to: satisfy Stokes equations the situation, namely Reynolds number is less than 0. 25-laminar flow conditions, while not Brownian motion particle settling velocity impact. This standard applies to

Document data

International classification (ICS): 77.040.30.

Chinese classification (CCS): H21.

Estimated length of the Chinese original: 13,122 words.

Adopted international standard: ISO 10076-1991; IDT.

Supersedes the earlier edition GB/T 6524-1986.
