What this standard covers

This standard applies to the determination of the volume of a certain volume of gasoline vapor formed at atmospheric pressure, the volume ratio of these two test temperature gas to the gasoline - liquid ratio (V/L) represented by. This standard does not apply to assessment containing alcohol, ether or glycerol can be dissolved in the fuel other compounds (hereinafter referred to as glycerol) is composed. Petrol gas - liquid ratio (V/L) means at any specified temperature and pressure, vapor liquid equilibrium volume of liquid fuel loaded at 0 ? volume ratio.

Document data

International classification (ICS): 75.160.20.

Chinese classification (CCS): E31.

Estimated length of the Chinese original: 5,587 words.

Adopted international standard: ASTM D2533-1982, NEQ.
