What this standard covers

This standard specifies: the spectrophotometric determination of trace copper content of rubber methods. This standard applies to: copper content not exceeding 10mg/kg- natural and synthetic raw rubber, latex, rubber compound and vulcanized rubber. Copper above 10mg/kg- sample, adjust the quality of the sample or the solution can be measured after appropriate dilution. This method is also applicable to hydrofluoric acid treatment containing silica rubber.

Document data

International classification (ICS): 83.060.

Chinese classification (CCS): G40.

Estimated length of the Chinese original: 6,614 words.

Adopted international standard: ISO 8053-1995; MOD.

Supersedes the earlier edition GB/T 7765-1987.
