What this standard covers

This standard specifies a method for measuring the role of various textile formaldehyde gas resistant ability. Such as wrinkle-free fabric with formaldehyde gas after finishing cloth stored together under circumstances likely to be encountered in the warehouse. This standard is not suitable for assessing products made ??with urea formaldehyde generated when the DP finish discoloration, staining or discoloration of the treated solution was treated with formaldehyde generated.

Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W04.

Estimated length of the Chinese original: 6,666 words.

Adopted international standard: ISO 105-X09-1994, MOD.

Supersedes the earlier edition GB 7078-1986.
