

ICS 33.100
CCS L 06

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 7349-2002

Replacing GB/T 7349-1987

**Methods of measurement of radio interference from high
voltage overhead power transmission line and substation
(English Translation)**

Issued on: January 4, 2002

Implemented on: August 1, 2002

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People Republic of China**

What this standard covers

This standard specifies the measurement of high voltage overhead power transmission lines, substations, radio interference produced by a method. This standard applies to the voltage level of 500 kV and below normal running away from the pressure of overhead transmission line and substation, ring for the frequency range (0. 15 ~ 30) MHz radio interference measurements.

Document data

International classification (ICS): 33.100.

Chinese classification (CCS): L06.

Estimated length of the Chinese original: 6,653 words.

Supersedes the earlier edition GB/T 7349-1987.
