### What this standard covers

This standard specifies the varnish impregnated, bare round copper wire and impregnated, bare or enamelled round copper wire for general requirements. Conductor nominal diameters see the appropriate product standards (product model and labeling see Appendix D). When referring to GB/T 7672. 22, GB/T 7672. 23 and GB/T 7672. 24 in one standard glass round copper winding wire, it should give the following contents: -GB number and/or IEC Code, the nominal diameter of the conductor, mm, paint and silk cladding thickness class.

### Document data

International classification (ICS): 29.060.10.

Chinese classification (CCS): K12.

Estimated length of the Chinese original: 17,177 words.

Adopted international standard: IEC 60317-0-6-2007, IDT.

Supersedes the earlier edition GB/T 7672.1-1987.
