What this standard covers

This standard specifies the required moisture coal granular activated carbon devices, processing steps and the measurement results and other content determination. This standard applies to the determination of moisture coal granular activated carbon, also applies to the determination of powdered activated carbon from coal moisture. This standard is not suitable for heat-sensitive, non-moisture coal particles containing activated carbon adsorption of water quality.

Document data

International classification (ICS): 75.160.10.

Chinese classification (CCS): D24.

Estimated length of the Chinese original: 3,375 words.

Adopted international standard: ASTM D2867-1991, NEQ.

Supersedes the earlier edition GB 7702.1-1987.
