What this standard covers

This standard specifies the asphalt mixing plant (hereinafter referred to as asphalt mixing plant) terms, specifications. And lists the theoretical performance of these devices and the drafting of technical documents used to determine the parameters. This section does not specify safety requirements of professional standards involved. Quality control of manufacturing equipment is determined by specific standards for these products. This section applies whether or not the function itself has moved, but in a fixed state of mixing equipment at work. This section does not apply to stabilized soil mixing or refurbished mobile devices.

Document data

International classification (ICS): 01.040.91; 91.220.

Chinese classification (CCS): P97.

Estimated length of the Chinese original: 31,356 words.

Adopted international standard: ISO 15642-2003, IDT.

Supersedes the earlier edition GB/T 7920.11-1987.
