

ICS 27.020
CCS J 91

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 8243.4-2003

**Methods of test for full-flow lubricating oil filters for internal
combustion engines -- Part 4: Initial particle retention efficiency,
life and cumulative efficiency (gravimetric method)**

(English Translation)

Issued on: April 15, 2003

Implemented on: September 1, 2003

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People Republic of China**

What this standard covers

This standard specifies the determination of the internal combustion engine full-flow oil filter performance test methods. Chapter 2: The original filter efficiency, given the specified test conditions, the determination of the original oil filter element shake clear filtration efficiency test procedures and parameters. 2. 6 finishing according to test results, can be drawn at any particle filtration efficiency of the estimation. Department of filtration efficiency by gravimetric method. Chapter 3: life and cumulative efficiency. Determination of oil filter cartridge gives life and efficiency with integrated rubber test procedures and parameters. Cumulative efficiency system with gravimetric method.

Document data

International classification (ICS): 27.020.

Chinese classification (CCS): J91.

Estimated length of the Chinese original: 24,228 words.

Adopted international standard: ISO 4548-4-1997, IDT.
