### What this standard covers

This standard specifies the method for the determination of various types of aluminum chloride-resistant textile color temperature carbonization process. Such carbonization treatment is to remove impurities and vegetable processing design. This standard is mainly used for wool and woolen textiles containing, in particular those that also contain textiles acetate or polyamide fibers.

### Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W04.

Estimated length of the Chinese original: 4,469 words.

Adopted international standard: ISO 105-X01-1993, MOD.

Supersedes the earlier edition GB/T 8439-1987.
