What this standard covers

This standard specifies the representation of various combinations of textile fibers defined (from fiber to cable) of key terms, and lists showing the relationship between the production of each term. This standard covers only general terms without including special fibers (such as hemp, silk, textile glass fibers, metal fibers, carbon fibers, etc.) specialized terminology and definitions. This standard does not include representation terminology and related manufacturing and processing methods with the number of fibers and yarns, said term performance.
