What this standard covers

This standard specifies the method for determining the depth of the hardened layer sintered iron-based material carburizing or carbonitriding with micro-hardness test. This standard applies to quench the iron-based sintered material.

Document data

International classification (ICS): 77.040.20.

Chinese classification (CCS): H72.

Estimated length of the Chinese original: 7,748 words.

Adopted international standard: ISO 4507-2000, IDT.

Supersedes the earlier edition GB/T 9095-1988.
