Standardization Administration**

## Table of Contents

|                                          |
|------------------------------------------|
| 1 Scope                                  |
| 2 Normative references                   |
| 3 Types and parameters                   |
| 3.1 Nominal pressure                     |
| 3.2 Nominal size                         |
| 3.3 Outer diameter of steel pipe         |
| 3.4 Flange type and code                 |
| 3.5 Sealing surface type and code        |
| 3.6 Flange type and scope of application |
| 4 Type and size of flange                |
| 4.1 Flange sealing surface size          |
| 4.2 Type and size of flange              |
| 5 Technical requirements                 |
| 5.1 Materials                            |
| 5.2 Pressure-temperature ratings         |
| 5.3 Dimensional tolerance                |
| 5.4 Connecting the sealing surface       |
| 5.5 Fasteners and gaskets                |
| 5.6 Type and size of welding end         |
| 5.7 Processing and manufacturing         |
| 6 Experiment                             |
| 7 Inspection and acceptance              |
| 7.1 Inspection                           |
| 7.2 Acceptance                           |
| 8 Signs and Marks                        |
| 8.1 Logo                                 |
| 8.2 Marking                              |
| 9 Supply requirements                    |
| 1 Scope                                  |
| 2 Normative references                   |
| 3 Types and parameters                   |
| 3.1 Nominal pressure                     |

3.1.1 Refer to GB/T 1048 for the definition of nominal pressure.

3.1.2 This Part specifies the following 6 pressure levels marked with Class for nominal pressure.

3.2 Nominal size

3.2.1 Refer to GB/T 1047 for the definition of nominal size.

3.2.2 This Part specifies the following 20 specifications marked with DN (NPS) for nominal sizes.

3.3 Outer diameter of steel pipe
