Reg control number

Annex C (informative) This standard and IEC 60092-374. 1977 and IEC 60092-375. 1977 technical difference

Foreword

This revised standard adopts IEC 60092-374. 1977 "Electrical equipment of ships and marine communications cable RF cable non-critical communication Telephone cable "(in English) and IEC 60092-375. 1977" Electrical equipment of ships and marine communications cable RF cable general instrumentation, control System and the communication cable "(in English).

The standard IEC 60092-374. 1977 and IEC 60092-375. 1977 made the following changes.

- Remove the IEC 60092-374. 1977 and IEC 60092-375. 1977 Foreword;
- Increase the national standard foreword;
- The "this publication" to "this standard";
- Remove the IEC 60092-374. 1977 and IEC 60092-375. 1977 Foreword;

- Use the decimal symbol instead of decimal symbol " , . " , " ;
- Referenced standards, rather than the international standard of equivalent international standards;
- Some of the statements apply to international standards to apply to our standard formulation;
- Errata the IEC 60092-374. 1977 specified in the insulation resistance of not less than 45Mohm · km, instead 8Mohm · km.

This standard replaces GB/T 9333.1-1988 "shipboard symmetrical communication cables - General." this standard and GB/T 9333.1-1988 have compared the following changes.

- Change the standard name, and IEC 60092-375. 1977 is consistent;
- Increasing the preface, in line with GB/T 1.1-2000 of the relevant provisions;
- Change the scope of application, covering IEC 60092-374. 1977 and IEC 60092-375. Scope 1977 (1988 edition Excerpts of chapter 1); Chapter 1;
- Change some reference standards, the use of a standard equivalent to international standards (1988 edition Chapter 2; Chapter 2 of this edition);
- Change GB/T 9333.1-1988 Chapter 3. definitions, terms and definitions instead. In line with GB/T 1.1-2000 regulation Set (1988 edition, Chapter 3; edition Chapter 3);
- Remove the GB/T 9333.1-1988 Chapter 4. Product name and code, this chapter moved informative Appendix A Excerpts Chapter 4, to "Overview" (1988 edition, Chapter 4; edition Chapter 4);
- Revised GB/T 9333.1-1988 Chapter 5. conductor, this chapter in accordance with IEC 60092-374. 1977 and IEC 60092-375. 1977 provisions were expressed (1988 edition Chapter 5; Chapter 5 of this edition);
- Revised GB/T 9333.1-1988 Chapter 6. insulation, this chapter in accordance with IEC 60092-374. 1977 and IEC 60092-375. 1977 provisions were expressed (1988 edition, Chapter 6; Chapter 6 of this edition);
- Revised GB/T 9333.1-1988 Chapter 7. cable core element to a cable, this chapter in accordance with IEC 60092-374.
1977 and IEC 60092-375. 1977 provisions were expressed (1988 edition, Chapter 7; Chapter 7 of this edition);
- Revised GB/T 9333.1-1988 Chapter 8. sheath, to a cable, this chapter in accordance with IEC 60092-374. 1977 and IEC 60092-375. 1977 provisions were expressed, see Chapter 10, covering sheath (1988 edition, Chapter 8; Chapter 8 of this edition);
- Revised GB/T 9333.1-1988 Chapter 9. Finished cable shield to this chapter in

accordance with IEC 60092-374. 1977 and IEC 60092-375. 1977 provisions were expressed, finished cable see Chapter 12 (1988 edition, Chapter 9; Chapter 9 of this edition);

--- Remove the GB/T 9333.1-1988 Chapter 10. Delivery length instead jacket, this chapter in accordance with IEC 60092-374. 1977 and IEC 60092-375. 1977 provisions were expressed (1988 edition Chapter 10; Chapter 10 of this edition);

--- Remove the GB/T 9333.1-1988 in Chapter 11. Testing and inspection, to identify the cable, this chapter in accordance with IEC 60092-374:1977 and IEC 60092-375. 1977 provisions were expressed (1988 edition Chapter 11; Chapter 11 of this edition);

--- Remove the GB/T 9333.1-1988 in Chapter 12. packaging, to the finished cable, this chapter in accordance with IEC 60092-374. 1977 and IEC 60092-375. 1977 provisions were expressed (1988 edition Chapter 12; Chapter 12 of this edition);

--- Modify the insulation material to comply with IEC 60092-351:2004 specified mixture;

--- Modify the jacket material to comply with IEC 60092-359:1999 provisions thereof.

This standard Annex A, Annex B and Annex C is informative appendix.

The standard proposed by China Electrical Equipment Industrial Association.

This standard by the national wire and cable Standardization Technical Committee (SAC/TC213) centralized.

1 Scope

This standard specifies the marine non-critical communication telephone cables and general marine instrumentation, control and communication equipment communication cable specifications, knot Configuration, and performance requirements.

This standard applies to non-marine cables and telephone communication important marine general instrumentation, control and communication equipment communication cable.

Cables in this standard is mainly used in AC or DC 60V and below the system of work, but also in case of failure or AC DC voltage 250V and below during normal operation.

2 Normative references

The following documents contain provisions which, through reference in this standard and become the standard terms. For dated references, subsequent Amendments (not including errata content) or revisions do not apply to this standard, however, encourage the parties to the agreement are based on research Whether the latest versions of these documents. For undated reference documents, the latest versions apply to this standard.
