

ICS 33.060
CCS M 53

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 9391-2025

Replacing GB/T 9391-1988

**Maritime navigation and radiocommunication equipment and
systems - Shipborne radar - Performance requirements,
methods of testing and required test results**
(English Translation)

Issued on: October 5, 2025

Implemented on: May 1, 2026

Issued by: State Administration for Market Regulation

Table of Contents

Preface
1 Scope
2 Normative References
3 Terms and Definitions
4 General Provisions
4.1 General Rule
4.2 Objective
4.3 Application of relevant standards
4.4 Equipment Classification
4.5 Establishment of Equipment Type and Status
4.6 Measurement conditions and related definitions
4.7 Quality Requirements
5 Tests
5.1 Test Site and Simulation
5.2 Test Terminology and Format
6 Radar performance
6.1 General Rules
6.2 Transmission and Jamming
6.3 Performance Optimization and Monitoring
6.4 Gain and Clutter Suppression Functions
6.5 Signal Processing
6.6 Operations related to SART, RTE, and beacons
6.7 Minimum effective range and range compensation
6.8 Distance and orientation resolution
6.9 Target Detection Performance Evaluation
6.10 Radar antenna (including pitch and roll)
6.11 Radar Availability - Standby and Transmission
7 Display of the monitor
7.1 General Rules
7.2 Linear and Indication Delay
7.3 Color Selection and Identification
8 CCRP and this ship

- 8.1 CCRP
- 8.2 Own ship 37
- 9 Navigation tools
 - 9.1 Overview
 - 9.2 Measurement Units
 - 9.3 Display Method
 - 9.4 Range display
 - 9.5 Dynamic Distance Marker (VRM)
 - 9.6 Electronic Booster (EBL)
 - 9.7 Cursor
 - 9.8 Measurement of Distance and Azimuth Offsets
 - 9.9 Parallel Indicator (PI) Line
 - 9.10 Azimuth dial
 - 9.11 Fixed Distance Marker
 - 9.12 Radar Map
 - 9.13 Route
- 10 Pointing, Motion, and Stabilization Modes
 - 10.1 General Rule
 - 10.2 Azimuth pointing to 47 degrees.
 - 10.3 Motion and Pointing Modes
 - 10.4 Eccentricity
 - 10.5 Earth stability and water stability
- 11 Collision Avoidance Assist
 - 11.1 General Rules
 - 11.2 Target Wake and Past Position
 - 11.3 Target Tracking (TT)
 - 11.4 Limitations of Tracking
 - 11.5 Automatic Identification System (AIS)
 - 11.6 Data on radar and AIS targets
 - 11.7 Target Alarm
 - 11.8 Target Relevance
 - 11.9 Trial operation of vessel
- 12 Chart radar (optional)
 - 12.1 General requirements
 - 12.2 Additional Requirements for Independent Radars with Charting Capabilities

12.3 Additional Requirements for ECDIS Backup (Optional)	
13 Ergonomics Principles (Control Functions and Displays)	
13.1 Overview	
13.2 Operation Control	
13.3 Basic Control Functions	
13.4 Control Characteristics	
13.5 Default settings and user-saved settings	
14 Interface	
14.1 General Rules	
14.2 Input Interface	
14.3 Output Interface	
15 Design, maintenance and installation	
15.1 Overview	
15.2 Fault Diagnosis and Maintenance	
15.3 Monitor Design	
15.4 Transceiver Design	
15.5 Antenna Design	
15.6 Radar Switching and Multi-Radar Systems	
15.7 Multifunctional Display	
15.8 Safety --- Antennas and Radiation	
16 Alarms and Faults	
16.1 General Rules	
16.2 Backup and Standby Arrangements	
17 Environmental Testing	
17.1 General Rules	
17.2 Tests performed according to IEC 60945	
17.3 Additional Environmental Tests	
18 Equipment training and documentation provision	
18.1 Training Simulator	
18.2 Instructions and Documents	
18.3 Installation of Radar System	
18.4 Equipment Update Maintenance Information	
Appendix A (Informative) Guide to Radar Functions on Navigation Displays	
A.1 Overview	
A.2 Navigation Display Guide	

Appendix B (Normative) Unnecessary Emissions of Radar Systems

B.1 Overview

B.2 Requirement

B.3 Measurement Method

B.4 Use and Interpretation of ITU-R Recommendation M.1177

B.5 Required result

Appendix C (Informative) Calculation of Radar Cross Section (RCS) and Detection Range

C.1 Radar Equation

C.2 Effects of RCS Changes

C.3 Effect of Change in Target Distance

C.4 The impact of target and radar altitude on discrete (non-distributed) targets

C.5 Frequency-sensitive effect

C.6 Conclusion

C.7 Calculation formulas for Figures C.1 and C.2

Appendix D (Informative) Factors Affecting Target Detection

D.1 Detection

Foreword

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part 1: Structure and Drafting Rules of Standardization Documents".

Drafting.

This document supersedes GB/T 9391-1988 "Technical Requirements and Usage Requirements for Marine Radar - Test Methods and Test Results", and is consistent with...

Compared with GB/T 9391-1988, apart from structural adjustments and editorial changes, the main technical changes are as follows.

- a) A "Terms and Definitions" section has been added (see Chapter 3);
- b) A "General Provisions" section has been added (see Chapter 4);
- c) Added "Tests" (see Chapter 5);
- d) Added "Radar Performance" (see Chapter 6);
- e) Added "Display on the Monitor" (see Chapter 7);
- f) Added "CCRP and this ship" (see Chapter 8);
